

## 2021 Census Database in England and Wales

Census data is published for a number of different geographical areas. The most detailed being the Census Output area. In total there are 188,880 Output areas, making for around 133 households per area. A broad range of Census data was extracted and percentages calculated for each area. An output area is made up of a number of postcodes and each postcode within the same output area was given the same set of rates and a postcode directory was derived. This makes it easy to match and overlay the data to any addressed based database. The following information is held:-
